

imageperfect™ 3500 film

features & benefits

The ImagePerfect™ 3500 series is a high-quality, monomeric matt vinyl range with a semi-permanent, solvent-based adhesive. This range is available in black, white and 30 colours. This vinyl is a specially-formulated, flexible, calendered PVC to enable better cutting and faster and easier weeding.

ImagePerfect™ films in the 3500 Premium range are quality grade, flexible, self-adhesive, monomeric, calendered matt PVC with a pressure-sensitive, semi-permanent adhesive which has a medium bond for repositionability with a soft adhesion that can be peeled cleanly from most substrates after use. This product is suitable for the majority of internal applications and also for certain short-term, external applications.

SPECIFICATIONS	
description	monomeric, calendered PVC
colour	black, white, and 30 colours
face film thickness	75µ
adhesive	semi-permanent solvent acrylic
adhesive strength	15N/25mm (final tm 1/24h)
release paper	PE coated silicone paper, 140g/m ²
temperature range	-30°C up to +90°C
durability (UV Stable)	Up to 5 years
flame retardancy	adhered to steel, self-extinguishing
shelf life	2 years, 20°C / 50% humidity
