

silver frost film

features & benefits

IP 5805

ImagePerfect™ Silver Frost is a semi-opaque, matt, calendered PVC that is suitable for use on a wide variety of clean, dry surfaces. The film has been formulated to promote medium-term, exterior durability, whilst the liner has been engineered to deliver outstanding lay flat properties. This window film is specifically designed to be cut on computerised sign-making equipment, with its unique liner promoting enhanced weeding performance. ImagePerfect™ Silver Frost may be used in most interior applications and many exterior decorative and display applications where an etched glass or matt effect is required on a glass substrate, primarily for window decoration. The fact that this product has a metallised effect, allows for broader aesthetic choice than would be permitted with 'standard' crystal films.

Specifications	
DESCRIPTION	Polymeric calendered PVC
COLOUR	Semi-opaque matt
FACE FILM THICKNESS	80μ
ADHESIVE	Permanent solvent acrylic
ADHESIVE STRENGTH	20N/25mm (Finat TM 1/24h)
RELEASE PAPER	PE coated silicone paper, 140g / m ²
TEMPERATURE RANGE	- 30°C up to + 90°C
DURABILITY (UNPRINTED)	Up to 7 years
FLAME RETARDANCY	B1
SHELF LIFE	2 years, 20°C / 50% humidity
